OS	Windows Enterprise 22H2
Summary	[Inregistrare] User is not able to see an error message regarding password security

	conditions, when attempts to register an account with a weak password
Description	User doesn't see any typing security conditions when inserts a weak password on registration password field
Steps To Reproduce	<p>Steps:</p> <ol style="list-style-type: none"> 1. User opens https://www.monamiagro.ro/ application 2. User clicks on "Inregistrare" button and inserts valid inputs in "Nume" and "Email" fields 3. User inserts a random weak password in the "Parola" field, as "parola", "password", "123456" 4. User checks the "Am citit si sunt de acord cu termenii si conditiile" and "Nu sunt un robot" checkboxes and clicks on "INREGISTRARE" button <p>Actual results: User is able to insert and register his account with weak/unsecured values in the "Parola" field, like "123456", "abcdefgh", password input the same as name input, with no security restrictions or error message displayed</p> <p>Exepected results: User should see an error message regarding password security conditions, like "Password must contain at least 6 characters, one number/digit, one special character, one uppercase"</p>
Additional Information	The issue is also reproduced at "Contul meu" feature, when user tries to change his actual password with a weaker one, or with the same one used to register and log in
