Table Of Contents

1.Final Project - monamiagro.ro

1.1.Inregistrare

ORG-1270: [Inregistrare] Verify that user is able to register using valid credentials

ORG-1271: [Inregistrare] Verify that user receives a confirmation message after successful registration

ORG-1272: [Inregistrare] Verify that user is unable to register with default values

ORG-1276: [Inregistrare] Verify that user is unable to register with an email that has already been used

ORG-1278: [Inregistrare] Verify that user is unable to register without checking the form validation checkboxes

ORG-1282: [Inregistrare] Verify that user is unable to register with invalid email and valid name and password

ORG-1283: [Inregistrare] Verify that user is unable to register with a password length less than 6 characters

ORG-1285: [Inregistrare] Verify the registration is blocked if the values from the two Passw fields don't match

ORG-1288: [Inregistrare] Verify that user is unable to register with valid name and email and blank password

ORG-1290: [Inregistrare] Verify that user is unable to register with blank email and valid name and password

ORG-1293: [Inregistrare] Verify that user is unable to register with blank name and valid email and password

ORG-1297: [Inregistrare] Verify that user is not able to register an account using a weak password

ORG-1298: [Inregistrare] Verify that user receives a confirmation email after successful registration

1.2.Autenticare

ORG-1299: [Autenticare] Verify that user is able to login using valid email and valid password

ORG-1300: [Autenticare] Verify that user is unable to login with a valid email and an invalid password

ORG-1301: [Autenticare] Verify that user is unable to login with an invalid email and a valid password

ORG-1302: [Autenticare] Verify that user is unable to login with default values

ORG-1303: [Autenticare] Verify that user is unable to login with invalid credentials

ORG-1304: [Autenticare] Verify that user is unable to login with a valid email and blank password

ORG-1305: [Autenticare] Verify that user is unable to login with an blank email and a valid password

ORG-1306: [Autenticare] Verify if password is case sensitive

1.3.Logout

ORG-1307: [Logout] Verify that user can successfully logout

1.4.Ai uitat parola?

ORG-1308: [Ai uitat parola] Validate that the "Ai uitat parola?" hyperlink is working

ORG-1309: [Ai uitat parola] Verify that user is able to reset password with a valid registered email

ORG-1310: [Ai uitat parola] Verify that user cannot reset password with blank email

ORG-1311: [Ai uitat parola] Verify that user cannot reset password with an invalid email

1.5.Contul meu

ORG-1312: [Contul meu] Verify that user is able to access his account

ORG-1313: [Contul meu] Verify that user is able to change his password from his account

ORG-1314: [Contul meu] Verify that user is not able to change his password to a weak one from his account

ORG-1315: [Contul meu] Verify that user is not able to change his password with the same one used to log in

ORG-1316: [Contul meu] Verify that user is not able to add invalid personal data from his account

ORG-1317: [Contul meu] Verify that user isn't able to add invalid delivery address from his account

1.6.Cautare

ORG-1318: [Cautare] Verify that user is able to use the search option with a valid item name

ORG-1319: [Cautare] Verify that user is not able to initiate a search with a default value or a blank field

ORG-1320: [Cautare] Verify that user is able to use the search option with a partial item name

ORG-1502: [Cautare] Verify that user can see all relevant search results for his search query

1.7.Catalog produse

ORG-1321: [Catalog produse] Verify that user is able to navigate to desired products category page

ORG-1322: [Catalog produse] Verify that user is able to select main product category from the products menu

ORG-1323: [Catalog produse] Verify that the user can see relevant information about the desired products

ORG-1324: [Catalog produse] Verify that the user can access desired product page from the listing products

1.8.Cos

ORG-1325: [Cos] Verify that user can add a single product to shopping cart

ORG-1326: [Cos] Verify that user can add multiple items to the shopping cart

ORG-1327: [Cos] Verify that user can update the product quantity from shopping cart

ORG-1328: [Cos] Verify that user cannot update the product qty from shopping cart with a non-integer value

ORG-1329: [Cos] Verify that user can see shopping bag icon updated with the total items quantity

ORG-1330: [Cos] Verify that user is able to remove one item from shopping cart

ORG-1331: [Cos] Verify that user is able to remove all items from shopping cart

ORG-1332: [Cos] Verify if user can check how the cart is displayed with no items

ORG-1333: [Cos] Verify that user has the option to empty the cart from shopping cart

ORG-1334: [Cos] Verify that user is able to update cart from the shopping cart page

ORG-1335: [Cos] Verify that the user can update the product qty from cart using the “-“ and “+” buttons

ORG-1336: [Cos] Verify if user is able to see the products added to cart after he closes and reopens the app

ORG-1337: [Cos] Verify that the user cannot add an excessively large quantity of items to the shopping cart

ORG-1338: [Cos] Verify that user can't add to the cart a qty of product that exceeds the available stock limit

ORG-1339: [Cos] Verify that the user cannot add an out-of-stock item to the shopping cart

ORG-1340: [Cos] Verify if user can go to “Finalizare comanda” from cart

ORG-1341: [Cos] Verify if user can see “Total cos” on shopping cart page

ORG-1342: [Cos] Verify if user can see delivery information on shopping cart page

1.9.Contact

ORG-1344: [Contact] Verify that user is able to send a message with valid data through the “Contact” form

ORG-1345: [Contact] Verify that user is not able to send a message with invalid data through the “Contact” form

ORG-1348: [Contact] Verify that user is able to access the website's social media listed pages

ORG-1350: [Contact] Verify that user is able to access the website's contact information

1.10.Ajutor

ORG-1353: [Ajutor] Verify user is able to access complete information about return shipping products and refund

ORG-1355: [Ajutor] Verify that user is able to access accurate information about delivery conditions and costs

ORG-1357: [Ajutor] Verify user is able to access “Politica de confidentialitate” from the dialog pop-up box

ORG-1359: [Ajutor] Verify that user is able to access the “Politica de cookie” from the dialog pop-up box

1.11.Finalizare comanda

ORG-1425: [Finalizare comanda] Verify that user can place an order not being logged into an account

ORG-1426: [Finalizare comanda] Verify that user can place an order being logged into his existing account

ORG-1428: [Finalizare comanda] Verify that user is unable to place an order with empty mandatory fields

ORG-1430: [Finalizare comanda] Verify that user is able to add a new delivery address from checkout page

ORG-1431: [Finalizare comanda] Verify that user is able to add new billing information

ORG-1432: [Finalizare comanda] Verify that the user cannot place an order with invalid credentials

ORG-1433: [Finalizare comanda] Verify that user is redirected to a payment page when checks card payment

1.12.Compatibility testing

ORG-1367: [Compatibility] Verify that the user can successfully place an order from different browsers

ORG-1368: [Compatibility] Verify that the user can successfully place an order from different devices

1.13.Security testing

ORG-1366: [Security] Verify the user is able to see website's connection is secured

1.14.SMOKE testing

ORG-1517: [Inregistrare] Verify that user is able to register using valid credentials

ORG-1519: [Autentificare] Verify that user is able to login using valid email and valid password

ORG-1521: [Contul meu] Verify that user is able to change his password from his account

ORG-1522: [Catalog produse] Verify that user is able to select main product category from the products menu

ORG-1524: [Cos] Verify that user can add multiple items to the shopping cart

ORG-1525: [Cos] Verify that user is able to remove one item from shopping cart

ORG-1527: [Cos] Verify if user can see "Total cos" on shopping cart page

ORG-1528: [Finalizare comanda] Verify that user can place an order being logged into his existing account

1.15.Usability testing

ORG-1514: [Usability] Verify that the use of "*" mark of mandatory fields is explained

ORG-1509: [Usability] Verify that webpage can be resized and keeps its structure when zooming in and out

ORG-1510: [Usability] Verify that all input fields have a placeholder or a label

ORG-1513: [Usability] Verify that user can go to the website's homepage

1.Test Suite : Final Project - monamiagro.ro

1.1.Test Suite : Inregistrare

Test Case ORG-1270: [Inregistrare] Verify that user is able to register using valid credentials [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has https://www.monamiagro.ro/ opened on homepage		
#:	Step actions:	Expected Results:
1	User clicks on “Inregistrare” button	“Creeaza cont” pop-up window is displayed
2	User inserts valid inputs for all fields	User is able to complete the registration form with “Nume”, “Email”, “Parola” fields, without any error messages
3	User checks the “Am citit si sunt de acord cu termenii si conditiile” and “Nu sunt un robot” checkboxes and clicks on “INREGISTRARE” button	1. User is able to see a confirmation message for successful registration 2. User should be logged in automatically 3. User should receive a confirmation email
4	User clicks on “Contul meu” button	User is redirected to the “Contul meu” page
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1271: [Inregistrare] Verify that user receives a confirmation message after successful registration [Version : 1]	
Author:	alexandra.ripeanu
Preconditions: The user has the https://www.monamiagro.ro/ webapp opened on homepage	

#:	Step actions:	Expected Results:
1	User clicks on “Inregistrare” button	“Creeaza cont” pop-up window is displayed
2	User inserts valid inputs for all fields	User is able to complete the registration form with “Nume”, “Email”, “Parola” fields, without any error messages
3	User checks the “Am citit si sunt de acord cu termenii si conditiile” and “Nu sunt un robot” checkboxes and clicks on “INREGISTRARE” button	1. User successfully finishes the registration process 2. User is able to see a confirmation message displayed on the screen 3. User receives a confirmation email
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1272: [Inregistrare] Verify that user is unable to register with default values [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has https://www.monamiagro.ro/ opened on homepage		
#:	Step actions:	Expected Results:
1	User clicks on “Inregistrare” button	“Creeaza cont” pop-up window is displayed
2	User clicks on "INREGISTRARE" button leaving the “Nume”, “Email”, “Parola” fields blank	1. User can see an error message displayed on the screen 2. User is able to see that the “Nume”, “Email”, “Parola” fields are marked as required fields 3. User is unable to complete the registration
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	

Keywords:	None

Test Case ORG-1276: [Inregistrare] Verify that user is unable to register with an email that has already been used [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has the https://www.monamiagro.ro/ webapp opened on homepage		
#:	Step actions:	Expected Results:
1	User clicks on “Inregistrare” button	“Creeaza cont” pop-up window is displayed
2	User inserts valid inputs for “Name” and “Parola” fields	User is able to fill “Nume” and “Parola” fields without any error messages
3	User fills the "Email " input field with an email that has already been used for registration	User is able to fill the "Email " input field
4	User checks the “Am citit si sunt de acord cu termenii si conditiile” and “Nu sunt un robot” checkboxes and clicks on “INREGISTRARE” button	1. User is able to see an error message displayed on the screen 2. User is unable to complete the registration
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1278: [Inregistrare]Verify that user is unable to register without checking the form validation checkboxes [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has https://www.monamiagro.ro/ opened on homepage		
#:	Step actions:	Expected Results:
1	User clicks on “Inregistrare” button	“Creeaza cont” pop-up window is displayed

2	User inserts valid inputs for all fields	User is able to complete the registration form with “Nume”, “Email”, “Parola” fields without any error messages
3	User leaves the “Am citit si sunt de acord cu termenii si conditiile” and “Nu sunt un robot” checkboxes unchecked and clicks on “INREGISTRARE” button	1. User is able to see an error message displayed on the screen 2. User sees that “Am citit si sunt de acord cu termenii si conditiile” and “Nu sunt un robot” checkboxes are mandatory 3. User is unable to complete the registration
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1282: [Inregistrare] Verify that user is unable to register with invalid email and valid name and password [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions:	The user has https://www.monamiagro.ro/ opened on homepage	
#:	Step actions:	Expected Results:
1	User clicks on "Inregistrare" button	"Creeaza cont" pop-up window is displayed
2	User inserts valid inputs for "Nume" and " Parola" fields	User is able to complete the "Nume" and "Parola" fields without any error messages
3	User inserts invalid input for "Email" field	User is able to fill the "Email " input field
4	User checks the "Am citit si sunt de acord cu termenii si conditiile" and "Nu sunt un robot" checkboxes and clicks on "INREGISTRARE" button	1. User is able to see an error message displayed on the screen regarding email validation 2. User is unable to complete the registration
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	

Requirements	None
Keywords:	None

Test Case ORG-1283: [Inregistrare] Verify that user is unable to register with a password length less than 6 characters [Version : 1]

Author: alexandra.ripeanu

Preconditions:

The user has <https://www.monamiagro.ro/> opened on homepage

#:	Step actions:	Expected Results:
1	User clicks on "Inregistrare" button	"Creeaza cont" pop-up window is displayed
2	User inserts valid inputs for "Nume" and " Email" fields	User inserts valid inputs for "Nume" and " Email" fields
3	User enters a password with less than 6 characters in the "Parola" field	User is able to fill the "Parola" input field
4	User checks the "Am citit si sunt de acord cu termenii si conditiile" and "Nu sunt un robot" checkboxes and clicks on "INREGISTRARE" button	1. User is able to see an error message displayed on the screen for password length validation 2. User is unable to complete the registration

Execution type: Manual

Estimated exec. duration (min):

Importance: Medium

Requirements: None

Keywords: None

Test Case ORG-1285: [Inregistrare]Verify the registration is blocked if the values from the two Passw fields don't match [Version : 1]

Author: alexandra.ripeanu

Preconditions:

The user has <https://www.monamiagro.ro/> opened on homepage

#:	Step actions:	Expected Results:
1	User clicks on “Inregistrare” button	“Creeaza cont” pop-up window is displayed
2	User inserts valid inputs in all fields	User is able to fill the registration form with “Nume”, “Email”, “Parola” fields, without any error messages
3	User types a different password in the confirmation “Parola” field	User is able to fill the confirmation "Parola" input field with a different password
4	User checks the “Am citit si sunt de acord cu termenii si conditiile” and “Nu sunt un robot” checkboxes and clicks on “INREGISTRARE” button	1.User is able to see an error message displayed on the screen for mismatch passwords 2.User is unable to complete the registration
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1288: [Inregistrare] Verify that user is unable to register with valid name and email and blank password [Version : 1]

Author:	alexandra.ripeanu	
Preconditions:	The user has https://www.monamiagro.ro/ opened on homepage	
#:	Step actions:	Expected Results:
1	User clicks on "Inregistrare" button	"Creeaza cont" pop-up window is displayed
2	User inserts valid inputs for "Nume" and " Email" fields	User is able to complete the "Nume" and "Email" fields without any error messages
3	User leaves the "Parola" field unfilled, checks the "Am citit si sunt de acord cu termenii si conditiile" and "Nu sunt un robot" checkboxes and clicks on "INREGISTRARE" button	1.User is able to see an error message displayed on the screen 2.User sees the "Parola" field marked as mandatory 3.User is unable to complete the registration
Execution type:	Manual	

Estimated exec. duration (min):	
Importance:	Medium
Requirements	None
Keywords:	None

Test Case ORG-1290: [Inregistrare] Verify that user is unable to register with blank email and valid name and password [Version : 1]

Author:	alexandra.ripeanu	
Preconditions:	The user has https://www.monamiagro.ro/ opened on homepage	
#:	Step actions:	Expected Results:
1	User clicks on "Inregistrare" button	"Creeaza cont" pop-up window is displayed
2	User inserts valid inputs for "Nume" and "Parola" fields	User is able to complete the "Nume" and "Parola" fields without any error messages
3	User leaves the "Email" field blank, checks the "Am citit si sunt de acord cu termenii si conditiile" and "Nu sunt un robot" checkboxes and clicks on "INREGISTRARE" button	1.User is able to see an error message displayed on the screen 2.User sees the "Email" field marked as mandatory 3.User is unable to complete the registration
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1293: [Inregistrare] Verify that user is unable to register with blank name and valid email and password [Version : 1]

Author:	alexandra.ripeanu
---------	-------------------

Preconditions:		
The user has https://www.monamiagro.ro/ opened on homepage		
#:	Step actions:	Expected Results:
1	User clicks on “Inregistrare” button	“Creeaza cont” pop-up window is displayed
2	User inserts valid inputs for “Email” and “Parola” fields	User is able to complete the “Email” and “Parola” fields without any error messages
3	User leaves the “Name” field blank, checks the “Am citit si sunt de acord cu termenii si conditiile” and “Nu sunt un robot” checkboxes and clicks on “INREGISTRARE” button	1. User is able to see an error message displayed on the screen 2.User sees the “Nume” field marked as mandatory 3.User is unable to complete the registration
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1297: [Inregistrare] Verify that user is not able to register an account using a weak password [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has https://www.monamiagro.ro/ opened on homepage		
#:	Step actions:	Expected Results:
1	User clicks on “Inregistrare” button	“Creeaza cont” pop-up window is displayed
2	User inserts valid inputs for “Nume” and “Email” fields	User is able to complete the registration form with “Nume” and “Email” fields without any error messages
3	User inserts a random weak password in the “Parola” field	1.User is able to see an error message with a minimum specified password length 2. User is able to see an error message regarding the password strength 3. User is able to see security restrictions for the inserted password values

4	User checks the “Am citit si sunt de acord cu termenii si conditiile” and “Nu sunt un robot” checkboxes and clicks on “INREGISTRARE” button	1. User is able to see an error message displayed on screen 2. User is not able to continue the registration process
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1298: [Inregistrare] Verify that user receives a confirmation email after successful registration [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has the https://www.monamiagro.ro/ webapp opened on homepage		
#:	Step actions:	Expected Results:
1	User clicks on “Inregistrare” button	“Creeaza cont” pop-up window is displayed
2	User inserts valid inputs for all fields	User is able to complete the registration form with “Nume”, “Email”, “Parola” fields, without any error messages
3	User checks the “Am citit si sunt de acord cu termenii si conditiile” and “Nu sunt un robot” checkboxes and clicks on “INREGISTRARE” button	1. User successfully finnishes the registration process 2. User is able to see a confirmation message displayed on the screen
4	User checks his e-mail inbox	User is able to find in inbox the confirmation email from website for successful registration
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

1.2.Test Suite : Autenticare

Test Case ORG-1299: [Autenticare] Verify that user is able to login using valid email and valid password [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has https://www.monamiagro.ro/ opened on homepage User has already an account registered		
#:	Step actions:	Expected Results:
1	User clicks on “Autenticare” button	“Log In” pop-up window is displayed
2	User inserts a valid email address into "Email" field and a valid password into "Parola" field	1. User is able to type email address into "Email" field 2. User is able to type the password into "Parola" field
3	User clicks on "LOGARE" button	1. User is able to see a confirmation message for successful login 2. User should be logged in automatically
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1300: [Autenticare] Verify that user is unable to login with a valid email and an invalid password [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has https://www.monamiagro.ro/ opened on homepage User has already an account registered		
#:	Step actions:	Expected Results:
1	User clicks on “Autenticare” button	“Log In” pop-up window is displayed
2	User inserts a valid email address into "Email" field and an invalid password into "Parola" field	1.User is able to type email address into "Email" field

		2. User is able to type the password into "Parola" field
3	User clicks on "LOGARE" button	1. User can see an error message displayed on the screen 2. User is unable to complete the Login process
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1301: [Autenticare] Verify that user is unable to login with an invalid email and a valid password [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has https://www.monamiagro.ro/ opened on homepage User has already an account registered		
#:	Step actions:	Expected Results:
1	User clicks on “Autenticare” button	“Log In” pop-up window is displayed
2	User inserts an invalid email address into "Email" field and a valid password into "Parola" field	1.User is able to type email address into "Email" field 2. User is able to type the password into "Parola" field
3	User clicks on "LOGARE" button	1. User can see an error message displayed on the screen 2. User is unable to complete the Login process
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	

Keywords:	None

Test Case ORG-1302: [Autenticare] Verify that user is unable to login with default values [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has https://www.monamiagro.ro/ opened on homepage User has already an account registered		
#:	Step actions:	Expected Results:
1	User clicks on “Autenticare” button	“Log In” pop-up window is displayed
2	User leaves the "Email" and "Parola" fields empty and clicks on "LOGARE" button	1. User can see an error message displayed on the screen 2. User is able to see the "Email" and "Parola" fields marked as manadatory 3. User is unable to complete the Login process
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1303: [Autenticare] Verify that user is unable to login with invalid credentials [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions:		
The user has https://www.monamiagro.ro/ opened on homepage		
User has already an account registered		
#:	Step actions:	Expected Results:
1	User clicks on “Autenticare” button	“Log In” pop-up window is displayed
2	User inserts an invalid email address into "Email" field and an invalid password into "Parola" field	1.User is able to type email address into "Email" field

		2. User is able to type the password into "Parola" field
3	User clicks on "LOGARE" button	1. User can see an error message displayed on the screen for invalid credentials 2. User is unable to complete the Login process
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1304: [Autenticare] Verify that user is unable to login with a valid email and blank password [Version : 1]		
Author:	alexandra.ripeanu	
Preconditions: The user has https://www.monamiagro.ro/ opened on homepage User has already an account registered		
#:	Step actions:	Expected Results:
1	User clicks on “Autenticare” button	“Log In” pop-up window is displayed
2	User inserts valid email address into "Email" field and leaves the "Parola" field blank	User is able to type email address into "Email" field
3	User clicks on "LOGARE" button	1. User can see an error message displayed on the screen 2.User is able to see the "Parola" field marked as mandatory 3. User is unable to complete the Login process
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

--	--

Test Case ORG-1305: [Autenticare] Verify that user is unable to login with an blank email and a valid password [Version : 1]

Author:	alexandra.ripeanu	
Preconditions:		
The user has https://www.monamiagro.ro/ opened on homepage		
User has already an account registered		
#:	Step actions:	Expected Results:
1	User clicks on "Autenticare" button	"Log In" pop-up window is displayed
2	User leaves the "Email" field blank and inserts a valid password into "Parola" field	User is able to type the password into "Parola" field
3	User clicks on "LOGARE" button	1. User can see an error message displayed on the screen 2. User is able to see the "Email" field marked as mandatory 3. User is unable to complete the Login process
Execution type:	Manual	
Estimated exec. duration (min):		
Importance:	Medium	
Requirements	None	
Keywords:	None	

Test Case ORG-1306: [Autenticare] Verify if password is case sensitive [Version : 1]

Author:	alexandra.ripeanu	
Preconditions:		
The user has https://www.monamiagro.ro/ opened on homepage		
User has already an account registered		
#:	Step actions:	Expected Results:
1	User clicks on "Autenticare" button	"Log In" pop-up window is displayed
2	User inserts valid email address into "Email"	1. User is able to type email address into "Email" field

	field and an invalid password into "Parola" field	2. User is able to type the password into "Parola" field with uppercase instead of lowercase and reverse
